Manufacturing Operations

Easily identify dependencies between work orders and raw material availability to improve planning and capacity to promise.

Project Management (PJM) enhancements focused on financial control, budget management and snapshot management. This allows for improved cost management and better control of project profitability.

Distribution Operations

Manage logistics and track key information for a group of items with a single number driving efficiency across the supply chain.

Support continuous improvement programs by identifying issues, adjusting and then following up on previously identified problems allowing businesses to reduce costs and improve customer experience.

Cloud Service Offerings

Delivery of world class cloud capabilities offering customers unrivalled choice.

Service offerings include Single-tenant solution-as-a-service (SaaS), Single-tenant platform-as-a-service (PaaS) and multi-tenant SaaS running on Amazon Web Services (AWS).

Customer First Experiences

New responsive design framework will allow users to work on a variety of different devices regardless of the type or size of the device. It provides a page layout that adapts automatically to the size of the screen.

Connected Ecosystem

Introduction of new GraphQL API framework and Data Integration API to enable the connected ecosystem with flexibility and ease.

Global Compliance & Finance

Enhancements in multiple geographies supporting updated and new compliance requirements.

Updates to key day-to-day operations including bank statement reconciliation, automated journal creation and enhanced traceability.

Non-Conformance Management

The new Non-Conformance capabilities allow organizations to implement continuous improvement programs by identifying issues, adjusting and then following up on previously identified issues.

Tax Declaration Framework

Enhancements in multiple geographies supporting updated and new compliance requirements across Australia, France, Germany, North America, Poland, Portugal, Switzerland, and United Kingdom.

License Plate Management

Manage logistics and track key information for a group of items with a single number driving efficiency across the supply chain.
